

Medical devices  
that simplify everyday life

NordiCare<sup>®</sup>

We are a Swedish company that develops, manufactures and distributes medical class I devices within the product segments surgical, orthopedic and rehab.

Our products are used by healthcare providers and people who need supportive aids in their everyday life.

# Designed for users

Our products are designed and evaluated by our product development team. We aim to develop functional health care products in attractive design that can contribute to better treatment and care. All our products are designed to be easy to use and apply, both in everyday life and by medical professionals. The products must always be user-friendly, comfortable to wear and sustainable for everyday life.

# Carefully selected

We ensure carefully made choices in everything we do. From picking partners, decision making and evaluating environmental impact and sustainability of our products and services. Customers choosing NordiCare can always be assured we will manage their trust.

# Quality assurance

All our products are registered medical class I devices in accordance with the EU regulation on medical devices (MDR). This means our products meet the applicable regulatory requirements and are safe to use for the specified indication.

## Background

NordiCare was founded in 2004 by CEO Helena Peters. Helena also active in the foundation of Carlia Consulting AB in 1994. Today, we have just over 2000 B2B-customers throughout Europe, including public university hospitals and private healthcare providers. NordiCare however, is primarily targeting the Nordic market and is a contracted supplier for every university hospital in Sweden, Norway, Denmark and Finland. Apart from B2B, we offer our products to consumers through our e-commerce.

"We provide specialized expertise and professional services in everything we do."

## Viken

NordiCare head office and warehouse is located in Viken in southern Sweden. Here is where our products are developed, tested, stored and distributed from. Our skilful order team offers all our customers personal and full-scale service and support. From our warehouse we send products with exceptional delivery reliability (over 99%) - quick and direct to where they are needed. Our sales team with its base in Viken, has representatives in Sweden, Norway, Denmark and Finland and includes product specialists, licensed nurses and physiotherapists.
